Preliminary invitation to the
NAS Workshop 2025
at the National Library of Sweden, Stockholm

Dear Colleagues in the Netarchive Suite user community,

This is a preliminary invitation to a workshop on web harvesting in general and the use of NAS and Heritrix in particular. It is planned to be held at the National Library of Sweden in Stockholm in the **first half of March 2025**.

Since it's been six years since the last NAS workshop, we should have some to talk about. Possible items:

- NAS deployment and configuration experiences
- NAS development – bug fixing and missing features
- Integration with other software, as Pywb, Browsertrix, Solrwayback etc.
- Share experiences, practices and questions in the management of broad crawls
- Etc.

We suggests (as last time) a three day schedule, starting mid-day on day 1 and ending early afternoon on day 3. We will return in the autumn with more details.

Best regards and hope to see you all,

Peter Svanberg and Pär Nilsson

National Library of Sweden
